EXPERIENCE

CoReCo Technologies

Nov. 2024 – Present

Associate Software Engineer

Onsite

- Engineered **BettrLabs** frontend platform using React and TypeScript, and orchestrated multi-step **RAG pipelines** with OpenAI and Perplexity APIs, automating insights generation across **100+ products/day** while reducing analyst turnaround time by **60%** Live
- Architected scalable backend systems using **Node.js, FastAPI, and Valkey pub-sub**, improving API throughput and reducing latency by **40%**; built a multi-tenant RAG backend for **Nexus** scaling securely to **500+ tenants**
- Designed and deployed **BigBasket ETL pipelines** processing **50k+ product records/day** with LLM-based enrichment, achieving **99.8% data accuracy**
- Built production-grade **real-time voice agents** using Twilio, Deepgram, ElevenLabs, and OpenAI handling **1k+ conversations/week**, alongside serverless **AWS Lambda** pipelines delivering **500+ reports/month** and reducing manual effort by **80%**
- Delivered **MyFitMatra** full-stack platform including frontend, backend, admin panels, analytics dashboards, and white-labeling support for scalable multi-client deployments

CoReCo Technologies

July 2024 – Oct. 2024

Software Engineer Intern

Onsite

- Built context-aware **LLM chatbot backend** achieving **95% intent accuracy**, directly improving first-contact resolution for customer support
- Developed frontend and backend modules for **Wipro PARI's** enterprise parking automation system, delivering real-time workflow support across multiple operational sites
- Implemented secure **JWT-based session management** and REST-integrated monitoring dashboards; authored backend documentation adopted team-wide

PROJECTS

ORBIT | Docker, WebSocket, Node.js, Python

- Built a **secure ephemeral cloud compute engine** that spins up fully isolated Docker execution environments on-demand for Python, Node.js, and Bash workloads
- Engineered a **horizontally scalable WebSocket-based interactive terminal system** with dynamic package installation, TTL-based auto-expiry, and strict CPU, memory, process, and filesystem isolation per session

EDUCATION

Sadguru Gadage Maharaj College

June 2020 – June 2023

B.Sc. Computer Science; CGPA: **9.13**

Karad, Maharashtra

SKILLS

Languages : Python, TypeScript, JavaScript, SQL, Golang

Backend : Node.js, FastAPI, REST APIs, Microservices, RabbitMQ

Frontend : React, HTML5, CSS3, Tailwind CSS

Databases : PostgreSQL, MySQL, MongoDB, ChromaDB, Pinecone

AI / LLM : OpenAI API, LangChain, Perplexity, RAG pipelines, Transformers (GPT, BERT), semantic search

Cloud & Tools : Git, Docker, Linux, AWS (S3, Lambda, CloudWatch, SES, EC2), Kubernetes, CI/CD
