EXPERIENCE

CoReCo Technologies

Nov. 2024 – Present

Associate Software Engineer

Onsite

- Worked as a **Full Stack AI Engineer** on **BetrLabs**, contributing across early-stage PoC integrations, production feature development, AI workflows, and scalable backend systems
- Built and optimized **async APIs**, RAG pipelines, ETL workflows, and data processing infrastructure using **Node.js**, **FastAPI**, **PostgreSQL**, and **Valkey**
- Orchestrated multi-step **RAG pipelines** integrating OpenAI and Perplexity APIs, automating insights generation across **100+ products/day** and reducing analyst turnaround time by **60%**
- Developed scalable frontend systems using **React and TypeScript**, enabling high-performance AI-driven product development workflows
- Led a team of 2 engineers to design and build the MVP for **Nexus**, developing multi-tenant RAG backend services securely supporting **500+ tenants**
- Designed and deployed **BigBasket ETL pipelines** processing **50k+ product records/day** with LLM-based enrichment, achieving **99.8% data accuracy**
- Built production-grade **real-time voice agent** using Twilio, Deepgram, ElevenLabs, and OpenAI, handling **1k+ conversations/week**
- Developed serverless **AWS Lambda, SES, CloudWatch, and S3** pipelines generating **500+ reports/month**, reducing manual effort by **80%**
- Delivered **MyFitMatra** full-stack platform including frontend, backend, admin panels, analytics dashboards, and white-labeling support for scalable multi-client deployments
- Implemented secure **RBAC and ABAC authorization systems** for **Parkezy**, enabling fine-grained access control across multi-tenant applications and internal admin platforms
- Conducted technical interviews and mentored interns across backend development, AI workflows, and engineering best practices

CoReCo Technologies

July 2024 – Oct. 2024

Software Engineer Intern

Onsite

- Built context-aware **LLM chatbot backend** achieving **95% intent accuracy**, improving first-contact resolution for customer support
- Developed frontend and backend modules for **Wipro PARI's** enterprise parking automation system, supporting real-time operational workflows across multiple sites

PROJECTS

🔗 **ORBIT** | *Docker, WebSocket, Go, Node.js, Python*

- Built a **secure ephemeral cloud compute engine** spinning up isolated Docker execution environments on-demand for Python, Node.js, and Bash workloads
- Engineered a **WebSocket-based interactive terminal system** with dynamic package installation, TTL-based auto-expiry, and strict CPU, memory, process, and filesystem isolation

EDUCATION

Sadguru Gadage Maharaj College

June 2020 – June 2023

B.Sc. Computer Science; CGPA: **9.13**

Karad, Maharashtra

SKILLS

Languages: Python, TypeScript, JavaScript, SQL ,Go

Backend: Node.js, FastAPI, REST APIs, Microservices, RabbitMQ

Frontend: React, HTML5, CSS3, Tailwind CSS

Databases: PostgreSQL, MySQL, MongoDB, ChromaDB, Pinecone

AI / LLM: OpenAI API, LangChain, Perplexity, RAG pipelines, Transformers (GPT, BERT), Semantic Search

Cloud & Tools: Git, Docker, Linux, AWS (S3, Lambda, CloudWatch, SES, EC2), Kubernetes, CI/CD

ACHIEVEMENTS & EXTRACURRICULAR

- Selected for **TCS Ignite**, a national-level industry readiness initiative
- Awarded the **Propel Excellence Award** at CoReCo Technologies as the **only junior developer** recognized among senior engineers
- Active in builder and open-source communities including **Buildspace**, regularly participating in tech meetups, developer communities, and startup ecosystems
- Passionate about rapidly prototyping infrastructure, AI, and developer tools with a strong focus on **shipping fast and iterating quickly**
