Technical Skills

Languages: Python, TypeScript, JavaScript, SQL
Backend: Node.js, FastAPI, REST APIs, Microservices, RabbitMQ, Redis
Frontend: React, HTML5, CSS3, Tailwind CSS
Databases: PostgreSQL, MySQL, MongoDB, ChromaDB, Pinecone
AI / LLM: OpenAI API, LangChain, RAG Pipelines, Semantic Search, Vector Databases
Cloud & DevOps: AWS (Lambda, EC2, S3, SES, CloudWatch), Docker, Kubernetes, CI/CD, Linux, Git

Experience

CoReCo Technologies

Nov. 2024 – Present

Associate Software Engineer

Onsite

- Engineered scalable backend systems, async APIs, and microservices using Node.js, FastAPI, PostgreSQL, Redis/Valkey, and RabbitMQ for AI-driven product development platform.
- Designed and orchestrated multi-step RAG pipelines integrating OpenAI and Perplexity APIs, automating insights generation across 100+ products/day and reducing analyst turnaround time by 60%.
- Built multi-tenant AI backend infrastructure for Nexus, securely supporting 500+ tenants with role-based access control, isolated workflows, and scalable retrieval pipelines.
- Developed ETL and data processing pipelines handling 50k+ product records/day with LLM-based enrichment and semantic search workflows, achieving 99.8% data accuracy.
- Architected production-grade real-time voice AI agents using Twilio, Deepgram, ElevenLabs, WebSockets, and OpenAI, processing 1k+ conversations/week with low-latency streaming pipelines.
- Built and deployed serverless AWS infrastructure using Lambda, SES, S3, and CloudWatch to automate reporting workflows generating 500+ reports/month and reducing manual effort by 80%.
- Implemented RBAC and ABAC authorization systems across multi-tenant applications and internal admin platforms, enabling secure fine-grained access control.
- Developed scalable frontend systems using React and TypeScript for AI-powered internal tools, analytics dashboards, and operational workflows.
- Led a team of 2 engineers in designing and shipping MVP features, conducting technical interviews, mentoring interns, and improving backend engineering practices.

CoReCo Technologies

July 2024 – Oct. 2024

Software Engineer Intern

Onsite

- Built context-aware LLM chatbot backend systems achieving 95% intent accuracy, improving automated customer support resolution workflows.
- Developed backend APIs and real-time operational modules for Wipro PARI's enterprise parking automation platform using scalable service-oriented architecture principles.

Projects

Orbit | Docker, WebSockets, Go, Node.js, Python

- Built a secure ephemeral cloud compute engine spinning up isolated Docker execution environments on-demand for Python, Node.js, and Bash workloads.
- Engineered a WebSocket-based interactive terminal system with dynamic package installation, TTL-based auto-expiry, and strict CPU, memory, process, and filesystem isolation.
- Designed backend infrastructure for scalable sandbox orchestration, secure code execution, and real-time session lifecycle management.

Education

Shivaji University

June. 2020 – May 2023

Bachelor of Science in Computer Science

Karad, Maharashtra

Leadership / Achievements

- Selected for **TCS Ignite**, a national-level industry readiness initiative focused on software engineering and professional development.
- Awarded the **Propel Excellence Award** at **CoReCo Technologies** as the only junior developer recognized among senior engineers.
- Active in builder and open-source communities including **Buildspace**, regularly participating in tech meetups, developer communities, and startup ecosystems.
